Ms. Carolina Zhang/MDPI <carolina.zhang@mdpi.com>   18 Agustus 2022 22.37
Kepada: irene.tangkawarow@unima.ac.id, riyanarto@if.its.ac.id, daniel@if.its.ac.id

Dear Dr. Tangkawarow, Dr. Sarno and Dr. Siahaan,

Thank you for your submission. After check, we think the manuscript is
not within the scope of /Sustainability/, but is suitable for another
journal /Big Data and Cognitive Computing/
(http://www.mdpi.com/journal/BDCC).

BDCC (2504-2289) is an open access journal which is indexed by the ESCI
(Web of Science), Scopus, Ei Compendex and other databases. We just
received our latest Citescore 6.1 in Scopus (Q1 in three categories).

I am also serving as the managing editor for this journal. Would you
like to submit the manuscript to BDCC journal? If you agree, we will
help transfer the manuscript and process it next. Please let me know
if it is feasible.

Or we will reject the manuscript, you can choose to submit it to other
journals.

Thanks a lot for your support.

We are looking forward to hearing from you.

Best regards,
Ms. Carolina Zhang

https://www.mdpi.com/journal/BDCC/special_issues/semweb_tech
https://susy.mdpi.com/user/manuscripts/review_info/55b6473f39907e6e036d1ab5816c73d8

Unfortunately, we have decided that the article requires improvement before
it can be considered for peer review.

Please ensure also that the manuscript has been submitted using the correct
template. Guidelines, along with Word and LaTeX templates can be found on the
'Instructions for Authors' page at
https://www.mdpi.com/journal/BDCC/instructions/.

We would like to remind you that the journal charges article processing
charges (APC) for accepted papers. Please do not resubmit your paper to this
journal unless you have carefully prepared it according to the 'Instructions
for Authors' of the journal and have found a source of funds to cover the
APC. As BDCC is an open access journal, after publication the full text can
be accessed free of charge from the journal website.

If the editors have suggested that your manuscript should undergo English
editing, please address this during revision. We suggest that you have your
manuscript checked by a native English speaking colleague or use a
professional English editing service. Alternatively, MDPI provides an English
editing service checking grammar, spelling, punctuation and some improvement

of style where necessary for an additional charge (extensive re-writing is
not included), see details at https://www.mdpi.com/authors/english.

Please find academic editor's comments and resubmit revised manuscript at:

https://susy.mdpi.com/user/manuscripts/resubmit/55b6473f39907e6e036d1ab5816c73d8

We hope that you will be able to correct these issues soon and resubmit your
manuscript in the near future. Please note that your manuscript will receive
a new submission date after resubmission.

Kind regards,
Ms. Ines Huang

Journal	BDCC (https://www.mdpi.com/journal/BDCC) (ISSN 2504-2289)
Manuscript ID	BDCC-1895511
Type	Article
Title	ID2SBVR: A method for extracting business vocabulary and rules from an informal document (https://www.mdpi.com/2504-2289/6/4/119)
Authors	Irene Tangkawarow , Riyanarto Sarno * , Daniel Siahaan
Special Issue	Semantic Web Technology and Recommender Systems (https://www.mdpi.com/journal/BDCC/special_issues/semweb_tech)

Abstract   Semantics of Business Vocabulary and Rules (SBVR) is a standard that describes business knowledge in the form of controlled natural language. Business process designers develop SBVR from formal documents (e.g., standard operating procedure, official script procedures, and policy documents) and later translate SBVR into business process models. In many immature companies, these documents are often not available. This study introduced a novel approach called informal document to SBVR (ID2SBVR) for extracting operational rules of SBVR from informal documents (e.g., interview documents with end-users). ID2SBVR mines fact type candidates using word patterns or extracting triplets (actor, action, and object) in sentences. A candidate fact type is either complex, compound, or complex-compound sentence. ID2SBVR extracts the fact types from candidate fact types. Finally, ID2SBVR transforms the fact types into a set of SBVR operational rules. The experimental results show that our approach can extract the operational rules of SBVR from informal documents with almost perfect accuracy (0.91). Moreover, ID2SBVR can extract fact types with an accuracy of 0.96. The ID2SBVR succeeds in extracting a set of SBVR operational rules from an informal document. The unstructured data is successfully converted into semi-structured data for use in the pre-processing. The ID2SBVR allows to designer to automatically generate business process model from informal documents.

Comments and Suggestions for

Dear Authors,

Authors	First of all I would like to thank you very much for such interesting article.

In the article ID2SBVR: A method for extracting business vocabulary and 2 rules from an informal document the authors introduced a novel approach called informal document to SBVR (ID2SBVR) for extracting operational rules of SBVR from informal documents. ID2SBVR allows a business process designer to translate natural language from an interview document into operational rules in SBVR, which in turn can be trans-636 formed into BPMN. The presented solution is current and relevant for the development of implementation of Process Management in to company management strategy.

The article is clear and relevant for the field of business data analyses area. The structure is in a proper manner. The business implications are clearly indicated. The cited references are recent and selected properly and relevant for the subject of the article. The research procedure may be repeated. The used tables and graphs are easy to interpret and understand. Conclusion are prepared correctly and clearly presented.

Accept in Present Form: The paper is accepted without any further changes. |

| Comments and Suggestions for Authors | The study introduces a new method in doing linguistic analysis, which merits attention. However, it is a bit rough in the overall quality and should need further improvement. |

1. Abstract: some information is too concrete and can be reduced. Thus, only the key points can be better highlighted.

2. Related work: the authors should highlight the key point in the beginning of each paragraph or it will be quite confusing to get the focal point. Meanwhile, this section lacks a critique of the literature. What the authors will do is not based on the critique or the summary of the related work.

3. Experiment: are precision, recall, specificity, and accuracy classified by your experiment or which standard? Maybe the too complicated introduction of the method can be shortened whereas the experiment can be more concretely explained.

4. Implication: the theoretical implication is actually not theoretical, but methodological. The authors should think about what kind of linguistic theory they have enhanced to show the real theoretical contribution. Meanwhile, the practical implication is too short without a detailed explanation on how to use the method to generate related implication.

5. Conclusion: this section is better arranged before implication and it is better to insert a limitation section. Actually, no method is perfect.

6. The language needs to be edited, especially in the newly revised part. Its readability is not that good. Many problems also exist in the non-revised section as well.

Journal	BDCC (https://www.mdpi.com/journal/BDCC) (ISSN 2504-2289)
Manuscript ID	BDCC-1895511
Type	Article
Title	ID2SBVR: A method for extracting business vocabulary and rules from an informal document (https://www.mdpi.com/2504-2289/6/4/119)
Authors	Irene Tangkawarow , Riyanarto Sarno * , Daniel Siahaan
Special Issue	Semantic Web Technology and Recommender Systems (https://www.mdpi.com/journal/BDCC/special_issues/semweb_tech)

Abstract	Semantics of Business Vocabulary and Rules (SBVR) is a standard that describes business knowledge in the form of controlled natural language. Business process designers develop SBVR from formal documents (e.g., standard operating procedure, official script procedures, and policy documents) and later translate SBVR into business process models. In many immature companies, these documents are often not available. This study introduced a novel approach called informal document to SBVR (ID2SBVR) for extracting operational rules of SBVR from informal documents (e.g., interview documents with end-users). ID2SBVR mines fact type candidates using word patterns or extracting triplets (actor, action, and object) in sentences. A candidate fact type is either complex, compound, or complex-compound sentence. ID2SBVR extracts the fact types from candidate fact types. Finally, ID2SBVR transforms the fact types into a set of SBVR operational rules. The experimental results show that our approach can extract the operational rules of SBVR from informal documents with almost perfect accuracy (0.91). Moreover, ID2SBVR can extract fact types with an accuracy of 0.96. The ID2SBVR succeeds in extracting a set of SBVR operational rules from an informal document. The unstructured data is successfully converted into semi-structured data for use in the pre-processing. The ID2SBVR allows to designer to automatically generate business process model from informal documents.

Comments and Suggestions for Authors	The authors note that according to, among others, Mishra & Sureka, there are inconsistencies between Business Process Modeling Notation (BPMN) and Semantics of Business Vocabulary and Business Rules (SBVR). Accordingly, the authors' proposed value-added proposition is to perform automatic translation of the informal document into fact type and operational rules of SBVR; they entitle their approach ID2SBVR.

The authors should note that their unpacking of acronyms, such as SBVR, is redundant and inconsistent (please refer to lines 57-58; 77). In addition, the clarification of the BPMN/SBVR inconsistencies, expressed in Section 1, is not quite clear, and the value-add of ID2SBVR is not quite illuminated in Section 1 (please refer to lines 67 through 72). While this is somewhat further clarified on lines 118-126, I would suggest providing a sentence or two in Section 1, Even for the clarification on lines 118-126, it is still wanting with regards to explaining the inconsistencies and the value-add of ID2SBVR; for example, does ID2SBVR contribute towards examining subgraph-isomorphism? A few sentences in this regard would be extremely useful.

On line 519, there is an "Error! Reference source not found." Section 5 seems too abridged, and the reader is left unconvinced. The assertions are high, but the underlying substantiation could be buttressed. By the Conclusion in Section 6, the ID2SBVR distinction (from a technical/mathematical perspective) remains ambiguous. |

Comments and Suggestions for Authors	The paper is very interesting. The topic is current and deserves attention.
	The paper is easy to read, the logic is good.
	The methodology is clearly presented.
	I recommend adding some information to the conclusions related to existing similar methods, or comparisons.
	The results part must be presented more clearly!
	The bibliography is representative and well chosen.

Title	ID2SBVR: A method for extracting business vocabulary and rules from an informal document (https://www.mdpi.com/2504-2289/6/4/119)
Authors	Irene Tangkawarow , Riyanarto Sarno * , Daniel Siahaan
Special Issue	Semantic Web Technology and Recommender Systems (https://www.mdpi.com/journal/BDCC/special_issues/semweb_tech)

Abstract   Semantics of Business Vocabulary and Rules (SBVR) is a standard that describes business knowledge in the form of controlled natural language. Business process designers develop SBVR from formal documents (e.g., standard operating procedure, official script procedures, and policy documents) and later translate SBVR into business process models. In many immature companies, these documents are often not available. This study introduced a novel approach called informal document to SBVR (ID2SBVR) for extracting operational rules of SBVR from informal documents (e.g., interview documents with end-users). ID2SBVR mines fact type candidates using word patterns or extracting triplets (actor, action, and object) in sentences. A candidate fact type is either complex, compound, or complex-compound sentence. ID2SBVR extracts the fact types from candidate fact types. Finally, ID2SBVR transforms the fact types into a set of SBVR operational rules. The experimental results show that our approach can extract the operational rules of SBVR from informal documents with almost perfect accuracy (0.91). Moreover, ID2SBVR can extract fact types with an accuracy of 0.96. The ID2SBVR succeeds in extracting a set of SBVR operational rules from an informal document. The unstructured data is successfully converted into semi-structured data for use in the pre-processing. The ID2SBVR allows to designer to automatically generate business process model from informal documents.

Dear Dr. Tangkawarow,

Thank you very much for providing the revised version of your paper:

Manuscript ID: BDCC-1895511
Type of manuscript: Article
Title: ID2SBVR: A method for extracting business vocabulary and rules from an
informal document
Authors: Irene Tangkawarow *, Riyanarto Sarno, Daniel Siahaan
Received: 23 August 2022
E-mails: irene.tangkawarow@unima.ac.id, riyanarto@if.its.ac.id,
daniel@if.its.ac.id
Semantic Web Technology and Recommender Systems

Dear Ms. Huang,
Thank you for the update.
We hope the revised version meets the qualities required for future publication in Big
Data and Cognitive Computing Journal.
We look forward to hearing from you in due course.

Kind regards
Irene Tangkawarow

Dear Dr. Tangkawarow,

Congratulations on the acceptance of your manuscript, and thank you for
submitting your work to BDCC:

Manuscript ID: BDCC-1895511
Type of manuscript: Article
Title: ID2SBVR: A method for extracting business vocabulary and rules from an
informal document
Authors: Irene Tangkawarow *, Riyanarto Sarno, Daniel Siahaan
Received: 23 August 2022
E-mails: irene.tangkawarow@unima.ac.id, riyanarto@if.its.ac.id,
daniel@if.its.ac.id
Semantic Web Technology and Recommender Systems
https://www.mdpi.com/journal/BDCC/special_issues/semweb_tech
https://susy.mdpi.com/user/manuscripts/review_info/55b6473f39907e6e036d1ab5816c73d8

We will now edit and finalize your paper, which will then be returned to you
for your approval. Within the next couple of days, an invoice concerning the
article processing charge (APC) for publication in this open access journal
will be sent by email from the Editorial Office in Basel, Switzerland.

If, however, extensive English edits are required to your manuscript, we will
need to return the paper requesting improvements throughout.

We encourage you to set up your profile at SciProfiles.com, MDPI's
researcher network platform. Articles you publish with MDPI will be linked to
your SciProfiles page, where colleagues and peers will be able to see all of
your publications, citations, as well as other academic contributions.

We also invite you to contribute to Encyclopedia (https://encyclopedia.pub),
a scholarly platform providing accurate information about the latest research
results. You can adapt parts of your paper to provide valuable reference
information, via Encyclopedia, for others both within the field and beyond.

Kind regards,
Min Chen
Editor-in-Chief

Thank you for the great news.
We are very honored to have been allowed to publish our manuscript on Big Data and Cognitive Computing

We finished editing a few minor issues related to formatting and English,
as pointed out by the reviewers in the manuscript.
In the submit system, there is no button to resubmit the final edited version of the manuscript.
Please find the final version attached.
Thank you.

Dear Dr. Tangkawarow,

Thank you for your email. Actually we have already English-edited the
paper and made the layout editing, based on the accepted version of the
manuscript. Thank you for your understanding and cooperation. We just
sent you the proofreading request. Feel free to advise if you have any
questions.

Kind regards,

Dear Dr. Tangkawarow,

Thank you very much for your proofreading. We have now finalized your
paper with the next step being the online publication. However, our
finance department did not yet provide authorization to proceed, as
Article Processing Fees (APCs) are still unpaid. Can you please confirm
if you have received the APC invoice and let us know by when the payment
from your side may be completed?

Thank you for your cooperation. We look forward to hearing from you soon.

Dear Ms. Huang,
Thanks for your thoroughness. I have revised the article.
 Here are some revisions that I present in the latest version of the article:
1) In the abstract, I add one sentence (3rd sentence) and one keyword.
2) Regarding the double reference, I added two related articles, so as not to change the order of the bibliography.
3) I've revised all the editor's notes.

Please check again if there are any parts that I missed.
Thank you

Kepada: "Ms. Ines Huang/MDPI" <ines.huang@mdpi.com>

Dear Mr. Huang,

Thank you for your email.
Please help me for this situation.
We really need to change the corresponding author name.
What should we do?
If there any form or document that we need to fullfil, please let me know.

Thank you very much.

Kind regards,
Irene Tangkawarow

Dear Ms. Huang, Thanks for your thoroughness. I have revised the
article. Here are some revisions that I present in the latest
version of the article: 1) In the abstract, I add one sentence (3rd
sentence) and one keyword. 2) Regarding the double reference, I added
two related articles, so as not to change the order of the bibliography. 3) I've revised all the editor's notes.

Please check again if there are any parts that I missed.
Thank you

Kind regards, Irene Tangkawarow

Dear Ms. Huang,

We are very grateful for the very fast response regarding the
process of publishing our articles. We ask for additional time for
APC payments for the next 2 weeks because there are several
obstacles related to our independent research funds.

Thank you for your understanding. We look forward to hearing from
you.

  Semantic
     Web
       Technology and Recommender Systems

    https://www.mdpi.com/journal/BDCC/special_issues/semweb_tech

https://susy.mdpi.com/user/manuscripts/review_info/55b6473f39907e6e036d1ab5816c73d8

We will now edit and finalize your paper, which will then be
returned to you for your approval. Within the next
couple of
days, an invoice concerning the article processing
charge (APC)
for publication in this open access journal will be sent by email from the Editorial Office in Basel, Switzerland.

If, however, extensive English edits are required to your
manuscript, we will need to return the paper requesting
improvements throughout.

We encourage you to set up your profile at
SciProfiles.com,
MDPI's researcher network platform. Articles you
publish with
MDPI will be linked to your SciProfiles page, where
colleagues
and peers will be able to see all of your publications, citations, as well as other academic contributions.

We also invite you to contribute to Encyclopedia (https://encyclopedia.pub), a scholarly platform providing accurate information about the latest
research results.
You can
adapt parts of your paper to provide valuable reference information, via Encyclopedia, for others both within
the field
and beyond.

Kind regards, Min Chen Editor-in-Chief

Kepada: Ines Huang <ines.huang@mdpi.com>, BDCC Editorial Office <bdcc@mdpi.com>

Dear Ms. Huang and BDCC Editorial Office,

We would like to thank you for the opportunity to revise and resubmit our paper entitled " ID2SBVR: A method for extracting business vocabulary and rules from an informal document " by Irene Tangkawarow, Riyanarto Sarno, and Daniel Siahaan.

We have carefully reviewed the comments and have revised the manuscript based on editor comments.

We hope the revised version meets the qualities required for future publication in Big Data and Cognitive Computing Journal. We look forward to hearing from you in due course.

Sincerely,

Irene Tangkawarow

Dear Authors,

Congratulations! Your manuscript has been published open access in BDCC.

Thank you for choosing our journal. Your article is now publicly and freely
available on the journal website. As part of the post-publication process, we
encourage you to promote and share your work to increase its visibility,
impact, and citations.

Please find the Publication Certificate and a banner for promoting your
manuscript here (please note, this is only available to corresponding authors
when logged into their account):
https://susy.mdpi.com/user/manuscripts/review_info/55b6473f39907e6e036d1ab5816c73d8

To promote the discoverability, views, and downloads of your manuscript you
can promote your manuscript in the following ways:

(1) Social Media
- Share your article on various social networks, such as Researchgate,
Sciprofiles Facebook, LinkedIn, Mendeley, and Twitter by clicking the share
button on the webpage of your article. Please do not forget to tag us,
@MDPIOpenAccess so that we can re-tweet your work to further increase its
visibility.
- Send a short text (up to 200 characters) to the MDPI assistant editor who
was your contact for the publication of your manuscript to post about your
manuscript on the journal's Twitter account.
- Write a blog post to explain the meaning and possible outcomes of your
Research.
- Ask your institution or society to post your paper on their social media
accounts and to include a story about your paper in their newsletters.

(2) Link Share
- Share the article link directly with colleagues and peers in your field.
- Add a link to your article in your email signature.
- Update your personal and institutional websites by adding the title of your

article and a link to it.

(3) Academic Research-sharing Platforms
- Set up your profile on academic research-sharing platforms, such as
SciProfiles, ResearchGate, Academia.edu, or Google Scholar, and add a summary
of your article.
- Register an ORCID author identifier and add the article information to your
profile.
- Deposit your article in repositories (such as those run by your university)
to make your research more discoverable.

(4) Conferences
- Showcase your publication at conferences in the form of a presentation or a
poster. You can find conferences hosted by MDPI to participate in at
Sciforum.net.

For additional tips to promote your article please see here:
https://www.mdpi.com/authors/promoting

Please keep up with any journal updates and news via our twitter account
(https://twitter.com/BDCC_MDPI)or LinkedIn page
(https://www.linkedin.com/company/bdcc-mdpi/).
Find out more about MDPI on our website: https://www.mdpi.com/about.

Please keep in touch!

Kind regards,
